

# How to sort out and disposed of for dumping the trash(2)

**Combustibles** This refers to such trash as kitchen garbage with packed sack designated by Amagasaki city government, and does not refer to bottles, cans, pet-bottles, metal small trash, papers, fabrics, and big sized trash.

- Less than 20cm metal small trash such as nail cutter is to be sort out as the combustibles.
- Sharp edged items such as the bamboo stick for baked chickens are to distort the top or wrap with the empty sweet or cake envelop for safety.(metal stick is to sort out as dangerous trash)
- Such trash as crude garbage or undesirable to be seen, are permitted to be packed with designated sack after putting them into any of the plastic bag.

**Food tray** Back to the supermarkets or outlets who are expected to surrender them for recycle.

**Bottles, Cans, Pet-bottles** These refer to the empty items used for the drinkable liquid.

**Bottle** • Returnable ones such as milk-bottle, beer bottle, sake bottle, are requested to get back to the sellers.

**Can** • More than 20cm cans used for such as cookies, or dried rice cakes are to sort out as metal small trash.

**Pet-Bottle** • This refers to the item marking . The plastic pet-bottles without this mark are to sort out as the combustibles.

**Papers, Fabrics** When the local resources collection groups are available, please ask then to collect.

**Papers** ※In addition to paper boxes and wrapping papers, ordinary envelop, support cardboard for shirt, paper bag, and catalogue for direct-mail are believed to be  recyclable.

**Paper-packs** Paper-packs for milk or juice showing the mark  are requested to hand over to the public facilities in public hall, or to deliver into the collection boxes of super-market, or to deliver to a local collection group.

**Fabrics** Since, sometimes, these are reusable overseas as clothing, wearable fabrics are requested (without taking the button off) (no rainy day dumping).  
 ※Prohibited to deliver are(Instead, requested are to sort out as the combustibles) broken, dirty, drenched, textiles used for eliminating dirt, paper diaper, stuffed animal, blanket, cotton warm clothing, and other similar items.

**Metal small trash** This refers to the materials easily collectable metal elements.

- See the under mentioned. The materials out of the rule in view of the size and materials will be sorted out to be the combustibles or big sized trash.
- This does not refer to the items listed in “Big sized trash tariff”
- Electric battery or cassette bombs are not included. Because these are dangerous, which causes fire or combustion.

**Size or dimension is limited to : 20cm~50cm**

- Electric appliances**  
iron, toaster, jar, electric warmer, handy-cleaner, bed-dryer, boiling-pot, hot-plate, radio-cassette, and others.
- Metallic domestic appliances**
